LIST OF CONTENTS FOR VOLUME 22, 1995

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1995 Volume 22, Number 1 January-February

Contents

M.-H. Chun and S.-J. Park	1	Effects of turbulence model and interfacial shear on heat transfer in turbulent falling liquid films
A. Pantokratoras	13	Some measurements in a turbulent round water plume. Comparison with two mathematical models
S.-B. Kim, M.-K. Chung, H.-Y. Lee and M.-H. Kim	25	A parametric study of geometric effect on the debris dispersal from a reactor cavity during high pressure melt ejection
M. Caira, G. Caruso and A. Naviglio	35	A correlation to predict CHF in subcooled flow boiling
A. Valencia	47	Heat transfer enhancement in a channel with a built-in square cylinder
E. Evren-Selamet	59	Solution of Benard problem with the projection method
G. Huelsz and E. Ramos	71	On the phase difference of the temperature and pressure waves in the thermoacoustic effect
N.S. Goel and Z. Ko	81	Heat conduction in heterogeneous materials and irregular boundaries III: A computer graphics based algorithm for calculating effective thermal parameters
A.Z. Şahin	89	Analytical solutions of transient heat conduction in semi-infinite solid with time varying boundary conditions by means of similarity transformation
A.S. Wood, G.E. Tupholme, M.I.H. Bhatti and P.J. Heggs	99	Steady-state heat transfer through extended plane surfaces
S.A. Noseir, A. El-Kayar, H.A. Farag and G.H. Sedahmed	111	Forced convection solid-liquid mass transfer at a fixed bed of Raschig rings
I. Dincer	123	Estimation of dimensionless temperature distributions in spherical products during hydrocooling
M.K. Liao and C.S. Li	133	On the prediction of frozen skin ratio in injection molding process by using boundary-tracking FDM
M. Hadidi, M. Guellal, M. Lachi and J. Padet	145	Loi de response d'un echangeur thermique soumis a des echelons de temperature aux entrees
	155	Erratum
	156	Announcement

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1995 Volume 22, Number 2 March-April

Contents

C.-X. Lin and S.-Y. Ko	157	Effects of temperature and concentration on the steady shear properties of aqueous solutions of carbopol and CMC
C.S. Li, C.F. Hung and Y.K. Shen	167	Finite element analysis for phase change problem in polymer processing
C.S. Li and Y.K. Shen	179	Optimum design of runner system balancing in injection molding
T.-H. Hsu, P.-T. Hsu and C.-.K. Chen	189	Thermal convection of micropolar fluids in a lid-driven cavity
B. Sawaf and M.N. Özisik	201	Determining the constant thermal conductivities of orthotropic materials by inverse analysis
F. Sharifi, M.R. Golkar Narandji and K. Mehravaran	213	Dynamic simulation of plate heat exchangers
B. Nowakowski and H.L. Frisch	227	Solution of the Fokker-Planck equation for a particle crossing a square well barrier
S.R. Bishop, P.G. Holborn and D.D. Drysdale	235	Experimental comparison with a compartment fire model
A. Barletta and E. Zanchini	241	Steady periodic heat transfer in a flat plate conductor carrying an alternating electric current
A.M. Tocci and R.H. Mascheroni	251	Numerical models for the simulation of the simultaneous heat and mass transfer during food freezing and storage
I. Nirdosh and G.H. Sedahmed	261	Free convective mass transfer in a cubical open cavity
I. Arshavski, Y. Nekhamkin, S. Olek and E. Elias	271	Conjugate heat transfer during falling film evaporation
T. Elperin and A. Fominykh	285	Combined mass and heat transfer during nonisothermal absorption in gas-liquid slug flow
J. Thevenin and D. Sadaoui	295	About enhancement of heat transfer over a circular cylinder embedded in a porous medium
K. Mansouri and B. Fourcher	305	Réponse a un r[illegible]al thermique sinusoïdal dans le cas d'un écoulement laminaire a plan directeur
D.A. Nield	317	Comments

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1995 Volume 22, Number 3 May–June

Contents

S.C. Chen, N.T. Cheng and K.S. Hsu	319	Simulation and verification of the secondary gas penetration in a gas-assisted-injection molded spiral tube
S. Kim, E. Choi and Y.I. Cho	329	The effect of header shapes on the flow distribution in a manifold for electronic packaging applications
K. Oyakawa, T. Taira, I. Senaha, T. Nosoko and M. Hiwada	343	Heat transfer control by using jet discharge in reattachment region downstream of a backward-facing step
S.-Y. Kim, and J.W. Cleaver	353	The persistence of drag reduction following the injection of microbubbles into a turbulent boundary layer
J. Liu, L. Ye and H. Liu	359	Flow patterns of flow boiling of a highly viscous pseudo-plastic fluid
T.-Y. Wang	369	Mixed convection from a vertical plate to non-Newtonian fluids with uniform surface heat flux
G. Degan and P. Vasseur	381	The non-Darcy regime for boundary layer natural convection from a point source of heat in a porous medium
L.R.Z. Pino and A.E. Sáez	391	Thermal dispersion in vertical gas-liquid flows with foaming and non-foaming liquids
J. Kowalski	401	Triple objective optimum design of a two-column radiator of central heating
C. Tiris, N. Ozbalta, M. Tiris and I. Dincer	411	Thermal performance of a new solar air heater
N.S. Goel and F. Gang	425	A general and computationally fast method for investigating incompressible flow
T. Elperin and A. Fominykh	435	Model of gas hydrate formation on the surface of a slug of a pure gas
R.-H. Yeh and M. Chang	445	Optimum longitundinal convective fin arrays

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1995 Volume 22, Number 4 July–August

Contents

Y.S. Cha, W.J. Minkowycz and S.Y. Seol	461	Transverse temperature distribution and heat generation rate in composite supercondcutors subjected to constant thermal disturbance
D. Lesnic, L. Elliot and D.B. Ingham	475	A note on the determination of the thermal properties of a materal in a transient nonlinear heat conduction problem
V. Masson and P.M. Carrica	483	Effects of an externally imposed electric field on subcooled boiling critical heat flux
I Shreiber	493	Analog of the Kutateladze crisis and uplifting water formation in drum boiler
A.V. Kuznetsov	499	Comparison of the waves of temperature difference between the solid and fluid phases in a porous slab and in a semi-infinite porous body
J. Thevenin	507	Transient forced convection heat transfer from a circular cylinder embedded in a porous medium
Y.K. Wu and M. Lacroix	517	Numerical simulation of the melting of scrap metal in a circular furnace
P.E. Viollaz, C.O. Rovedo and C. Suarez	527	Numerical treatment of transient diffusion in shrinking or swelling solids
A.O. Santillán and R.R. Boullosa	539	Space dependence of acoustic power and heat flux in the thermoacoustic effect
S. Syrjälä	549	Finite-element analysis of fully developed laminar flow of power-law non-Newtonian fluid in a rectangular duct
I. Dincer	559	Thermal cooling data for figs exposed to air cooling
I. Dincer	567	Heat transfer parameters for spherical particles subject to immersion heating
S. Yapar, Ş.Ş. Helvaci, and S. Peker	575	Temperature variations in drying of sulfuric acid solutions in sand beds. Part I: Temperature variations in the bed during the drying of water
Ş.Ş. Helvaci, S. Yapar and S. Peker	585	Temperature variations in drying of sulfuric acid solutions in sand beds. Part II: Temperature variations in the bed during the drying of water-sulfuric acid mixtures
T.N. Wong and K.T. Ooi	595	Refrigerant flow in capillary tube: An Assessment of the two-phase viscosity correlations on model prediction
P. Casses and M.A. Azouni	605	Determination de la vitesse critique d'une particule en interaction avec un front de solidification

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1995 Volume 22, Number 5 September–October

Contents

M.-H. Chun and Y.-S. Kim	617	A semi-empirical correlation for adiabatic interfacial friction factor in horizontal air-water countercurrent stratified flow
J. Gammon and J.A. Howarth	629	The two-dimensional Stefan problem with slightly varying heat flux
P.G. Tucker and C.A. Long	639	CFD prediction of vortex breakdown in a rotating cavity with an axial throughflow of air
P.-C. Liu	649	Thermocapillary instability in a horizontal liquid layer subjected to a transverse magnetic field and irradiation
M. Raudenský, J. Horský and J. Krejsa	661	Usage of neural network for coupled parameter and function specification inverse heat conduction problem
S.K. Das, B. Spang and W. Roetzel	671	Flow length effect in heat exchangers with turbulent flow at low Prandtl Number
C. Parthiban and P.R. Patil	683	Effect of non-uniform boundary temperatures on thermal instability in a porous medium with internal heat source
J. Rojas and F. Avila	693	Numerical and experimental study of transient natural convection in an inclined wall cavity
M. Rhazi, A. Mir, Z. Zrikem and G. Gouesbet	705	Buoyancy driven convection in a particle-fluid mixture layer heated from below
Z. Zapałowicz	713	Analysis of the process of wetting a horizontal heated surface area by a single water droplet
H. Minhas and G.S.H. Lock	721	Transitional forced convection in a bayonet tube
R. Kulkarni and P. Cooper	729	Temperature distribution and fluid flow in an enclosure with localized heating and cooling
T. Elperin and A. Fominykh	741	Liquid phase controlled mass transfer in gas-liquid slug flow at low Reynolds numbers
N.D. Kaushika and M. Arulanantham	751	Radiative heat transfer across transparent honeycomb insulation materials
R.C. Guar and N.K. Bansal	761	Periodic solution of heat and mass transfer equations in plane geometry

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1995 Volume 22, Number 6 November–December

Contents

R.N. Hills and P.H. Roberts	771	On the influence of solid-phase volume fraction on the adiabatic coarsening of a mushy zone
A.-K. Nehad	779	Enthalpy technique for solution of Stefan problems: Application to the keyhole plasma arc welding process involving moving heat source
C.F. Hung and Y.K. Shen	791	Numerical simulation of fiber orientation in injection mold filling
C.P. Tso, K.C. Leong and H.S. Tan	803	An analysis of natural convection film boiling from spheres using the spherical coordinate system
S. Piva	815	An analytical approach to fully developed heating of laminar flows in circular pipes
M. Fossa, C. Pisoni and L. Tagliafico	825	Experimental direct contact heat transfer in upward air-water developing annular flow
A. Pinarbasi and A. Liakopoulos	837	The role of variable viscosity in the stability of channel flow
J.C. Bokar, L. Silverberg and M.N. Özisik	849	An engineering foundation for controlling heat transfer in one-dimensional transient heat conduction problems
Z.-G. Feng and E.E. Michaelides	859	The symbolic operator representation applied to the derivation of solutions of unsteady heat diffusion problems
J.E. Peterson and K.D. Hotton	871	Numerical analysis of turbulent cross stresses and pressure in the developing region of an axisymmetric jet
J.M. Zhang, M.H. Su and W.H. Sutton	885	Thermal radiation in layered participating cylindrical media using an integral equation method
N. Ahmad and A. Mubeen	895	Boundary layer flow and heat transfer for the stretching plate with suction
M.-H. Su	907	High heat flux in glass
Announcements	919	First Trabzon International Energy and Environment Symposium
	920	ICHMT Symposium on Molecular and Microscale Heat Transfer in Materials Processing and Other Applications
	921	Eurotherm Seminar No. 49—Physical Models for Thermal Energy Stores
	923	LIST OF CONTENTS FOR VOLUME 22, 1995
	929	AUTHOR INDEX TO VOLUME 22, 1995
